MAY 2015

ViBeMac's 4650 EV9R - Automatic Belt Loop Setting Unit

The 4650 EV9R belongs to the 4650 EV series. This series is part of the technological development from the first loop setter, that was created by Vi.Be.Mac. in the 80's: the 1650 model was born over 30 years ago. In fact, Vi.Be.Mac. boasts 35 years of history. Established in 1980, as a service centre of Singer Sewing Machines at first, already in the early 80's Vi.Be.Mac. started producing machines under its own brand. The focus was on few but essential aspects: constant and high quality, higher productivity, flexibility, reduced number of operators and low running costs. In fact, these aspects can be fully found in the new 4650 EV9R, and 4650 EV7RR, developed by Vi.Be.Mac. engineers, in order to offer an ideal solution for attaching belt loop on jeans, while constantly improving and updating some important features.

Better than its predecessor under each and every aspect, the 4650 EV9R is much more efficient. Equipped with a completely new 7" coloured touch screen panel which is totally user friendly (the easiest to use ever made), new presser foot, new wiper, new 400W motor, and new software fully in house developed by Vi.Be.Mac. In fact, the bartack is fully customizable, and this allows to meet every fashion requirement. The New alignment system avoids the loop mispositioning on the fabric, especially for the folded details (now always aligned). Thanks to an optional device (sold separately) the 4650EV9R can at-

4650 EV9R

AUTOMATIC BELT LOOP SETTER

- New Loop Aligner Developed For Also 3d Loop
- New Presser Foot & New Wiper
- New Loop Cutting & Suction Device
- New 400 W Motors
- New COLOURED 7" Hi-res Touch Screen Panel
- Completely New Cpu
- Fully Customized Bartack

Thanks to all those who came to join us @
texprocess Frankfurt.
 Let's see you next year @ Atlanta, USA!

SPECIFICATIONS:

- ✓ Max Speed: 2.800 rpm
- ✓ No. of stitches: 1 to 999 (programmable)
- ✓ Needle gauge: 20 to 80 mm
- ✓ Loop width: 8 to 25 mm (optional 30 mm)
- ✓ Finished Loop: 32 to 85 mm
- ✓ Sewing Area: 15 x 28 mm
- ✓ New electronic bobbin winder
- ✓ New loop aligner developed for 3D loop
- ✓ Extra pressure on presser foot

The First And Only Approved for 3d Loop !!

With optional device:

Double Loop Sportswear Loop Classic Loop

tach also double, sportswear and classic loop.

Also the electronic of the EV9R is completely new:

- the CPU assures a much better software management, top seam quality, very high precision, and more customizations and fashion options. In fact the bartack is FULLY customizable.
- the remote control to simply update your patterns. Now the preview of new patterns is visible on the screen.
- the Auto-diagnostic system to avoid errors, with the Error History reporting, to easier supervise the unit condition.

In general, the belt-loop attaching process consists of several different

steps, the preliminarily cutting of the belt-loop strips into pieces, the fold into the belt-loop shape, and the sewing on the belt. Our Automatic Belt Loop Setter Unit automatically perform these steps, the operator only has to place the garment on the sewing machine. This means increasing productivity, saving time, energy and money.

If all these amazing features have affected you, please do not hesitate to contact us at the address vibemac@vibemac.com, and visit our website www.vibemac.com. If you want to see the machines at work in a real production line, please visit our youtube channel www.youtube.com/VIBEMACSpa
